

Exterior Aircraft Detailing

COMPLETE EXTERIOR WIPE DOWN – produces a clean, spot-free finish. This service covers all areas of the aircraft, such as:

- Belly
- Main Fuselage
- Landing Gear and Tail
- Entire Wings Including Underside and Flaps

PARTIAL EXTERIOR WIPE DOWN – includes wipe down of areas needing attention which generally includes:

- Nose
- Underside of the Engines
- Leading Edges

EXTERIOR WASH

- Debug leading edges
- Degrease under fuselage, wings, and landing gear
- Wash with an aviation specific cleaner
- Windows: Inspect and clean to remove bugs and/or water spots

EXTERIOR WAX

- Wisconsin Aviation detailers wipe down the airframe and then wax all the aircraft's painted surfaces. Areas on the exterior that are beginning to show signs of deterioration, such as dulling and oxidation, can be restored as the surface build-up of old wax, dirt and airborne chemicals are removed.

BRIGHT WORK BUFF AND POLISH – removes oxidation and water spots, restoring your aircrafts bright work to a clear, bright shine. This service includes:

- Leading edges
- Thrust Reversers
- Engine Inlets
- Horizontal and vertical stabilizers

POLISH DE-ICE BOOTS

- Polish with a boot refinisher specifically designed to leave a new, glossy shine.
- This process may include cleaning and stripping of the worn surface finish if necessary before polishing with a boot refinisher.
